

NATIONAL COUNCIL OF
TEACHERS OF MATHEMATICS

So you want to review for the *Journal for Research in Mathematics Education?*

Great! We are always looking for new reviewers with expertise in mathematics education, educational psychology, quantitative and qualitative research methodologies, and other related subjects.

To indicate your interest in reviewing, go to our ScholarOne site at <https://mc04.manuscriptcentral.com/jrme-nctm> and click on “Create an Account.” Make sure you select keywords as part of the registration process: That’s how we match appropriate reviewers to incoming manuscripts.

If you already have an account on ScholarOne but need to add or modify keywords, log in and click on your name in the upper right corner. Select “User ID & Password” from the drop-down menu to see the keyword selection page.

Did you know? JRME encourages reviewing mentorship. If you are a graduate student or postdoc, ask your advisor(s) about co-reviewing. Advisors who would like to mentor should contact us for guidelines.

Questions? Reach us at jrme@nctm.org
