How have you inspired your students to notice and wonder about the beauty of mathematics? Share your novel classroom approaches to student learning in NCTM’s digital-first member journal, *Mathematics Teacher: Learning and Teaching PK–12 (MTLT)*.

*MTLT* is a teacher-focused practitioner journal that spans the primary and secondary spectrum. Whether you teach PK or 12th grade, we think you have something to say. *MTLT* offers three primary article types: PK–12 Front-and-Center articles, grade-banded Feature articles, and grade-banded Focus articles. Where does your future article fit? See our Submission Guidelines (www.nctm.org/mtltsubmit) for details on article types and how to submit to the journal.

Have questions? Contact us at mtlt@nctm.org.
